## STEP-IV

The screenshot shows the Internet Options dialog box in Internet Explorer. The 'Trusted sites' tab is active. A callout box points to the checkbox labeled 'Require server verification (https:) for all sites in this zone', which is currently unchecked. The dialog box also shows a list of websites in the 'Trusted sites' zone, including 'http://hr.cbr.gov.pk' and 'http://10.16.5.222'. The background of the browser window shows a login page for 'hr.cbr.gov.pk' with a 'Sign in to HRS!' button and a 'Login' button.

Un-check "Require server verification (https :) for all sites in this zone."
